EDUCATION

B.Tech in Information Technology Charotar University of Science and Technology (CHARUSAT)	Sep 2024 – Jul 2028
Higher Secondary (Science) Utkarsh School of Excellence	Jul 2022 – May 2024

PROJECTS

FinLite – Smart Business Finance Manager (Ongoing)

- Built an AI-based finance system for business owners, hiding complex accounting terms
- Enabled company setup, income/expense tracking, and custom categories
- Developed smart entry box to convert natural language into automatic entries
- Processes 100+ transactions/day (~90% accuracy) with reports (PDF/Excel) and dashboard insights

FormFlux – Dynamic Form Generator

- Built dynamic form system with MongoDB and customizable fields
- Implemented authentication and dual-link access (public + owner)
- Added search functionality and Excel (.xlsx) export
- Automated database creation based on form structure

Resume → Job Fit Score (Hackamind 2026)

- Developed NLP-based tool to generate job fit score (out of 100) from resume + job description
- Provides skill-gap analysis and suggestions for improvement
- Built as a Micro SaaS with free trials and payment integration
- Improved matching accuracy by ~30%; developed during national hackathon

Bandhani E-Commerce Website

- Developed customized e-commerce platform for Bandhani traditional clothing
 - Focused on UI/UX design for smooth and user-friendly experience
 - Implementing product filtering, cart system, and responsive design
 - Aims to digitalize local business sales through an online platform
-
